## DETAILED ACTION

1. The office action is in reply to an amendment filed on 08/31/2007. Claims 1,16 have been amended. Claims 1-30 are pending.

### *Response to Arguments*

2. Applicant's arguments with respect to claims 1-30 have been considered but are moot in view of the new ground(s) of rejection.

### *Claim Rejections - 35 USC § 102*

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

4. Claims 1-7,10-22, and 25-30 are rejected under 35 U.S.C. 102(e) as being anticipated by Denning et al (hereinafter referred as Denning) US 7,143,289 B2.
5. As per claims 1,16: Denning discloses a method/System for processing data comprising: receiving a plurality of fixed coordinates that represent a location of an item (See Fig 3 steps 142,144-146, Fig 6 step 614 and col 3 lines 23-27); utilizing a cryptographic algorithm to process the plurality of fixed coordinates forming a processed data (See Fig 5 step 522 and col 6 lines 17-21); and comparing the processed data to at

least a portion of secondary data that comprises one or more fixed coordinates to determine whether a match exists(See col 12 lines 39-48,col 16 lines 29-33 and Fig 6 steps 612).

6. As per claims 2,17: Denning disclose further comprising the step of receiving data representing the location of the item and determining the plurality of fixed coordinates that represent the location of the item prior to receiving the plurality of fixed coordinates (See Fig 5 step 526, Fig 6 steps 602,614).

7. As per claims 3,18: Denning disclose the method further comprising the step of storing the processed data in a database (See col 28 lines 30-48).

8. As per claim 4,19: Denning discloses the method wherein the step of comparing the processed data to at least a portion of secondary data includes the secondary data comprising data previously stored in a database (See col 12 lines 39-48,col 16 lines 29-33 and Fig 6 steps 612).

9. As per claims 5,20: Denning discloses the method further comprising the step of matching the processed data to the at least a portion of secondary data that is determined to reflect an identical one of the plurality of fixed coordinates (See col 12 lines 39-48,col 16 lines 29-33 and Fig 6 steps 612).

10. As per claims 6, 21: Denning discloses the method further comprising the step of issuing a signal based upon a user-defined rule (See Fig 4B and Fig 9 steps 920,524).

11. As per claims 7,22: Denning discloses the method wherein the step of determining the plurality of fixed coordinates that represent the location occurs in relation to a grid (See col 17 lines 10-39).

14. As per claims 10,25: Denning discloses the method wherein the grid is a multi-dimensional grid (See col 17 lines 10-39).
15. As per claims 11,26: Denning discloses the method wherein the grid is based upon a user-defined criterion (See Fig 3 steps 144-146,147 and col 6 lines 49-53).
16. As per claims 12,27: Denning discloses the method wherein the user-defined criterion corresponds with quantity (See Fig 3 steps 144-146,147 and col 6 lines 49-53).
17. As per claims 13,28: Denning discloses the method wherein the user-defined criterion corresponds to time (See Fig 3 steps 144-146,147).
18. As per claims 14,29: Denning discloses the method wherein the step of determining the plurality of fixed coordinates that represent the location includes the step of determining a nearest of the plurality of fixed coordinates (See Fig steps 504,143,140 and col 7 lines 35-45).
19. As per claims 15,30: Denning discloses the method wherein the step of determining a plurality of fixed coordinates that represent the location includes the step of determining the plurality of fixed coordinates surrounding the location (See Fig steps 504,143,140 and col 7 lines 35-45).

***Claim Rejections - 35 USC § 103***

20. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

21. Claims 8-9,23-24 are rejected under 35 U.S.C. 103(a) as being unpatentable over Denning et al(hereinafter referred as Denning) US 7,143,289 B2 in view of Clapper (US Pub No 2003/0108202).

22. As per claims 8-9 and 23-24: Denning discloses claims 7, 22 as recited above. Denning does not explicitly disclose the method wherein the grid comprises a uniform grid and non-uniform grid. However Clapper discloses the method wherein the grid comprises a uniform and non-uniform grid (See 0018). Therefore it would have been obvious to one ordinary skill in the art at that time the invention was made to modify the teaching method of Clapper within Denning method inorder to determine location.

### ***Conclusion***

23. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of
